NO

### COURSE CONTENT

UNIT 1	UNIT 2	UNIT 3	UNIT 4
Module 1: Snorkeling and underwater exploration Module 2: Boating & trip planning	Module 3: Sustainable recreational fishing Module 4: Food from the sea	Module 5: Marine hazards & safety Module 6: Fishing rod construction	Module 7: Coastal landforms and ecosystems Module 8: Camping and boating
ASSESSMENT	ASSESSMENT	SUMMATIVE ASSESSMENT	SUMMATIVE ASSESSMENT
Module 1: Exam Module 2: Project and performance task Marine camp (3 days Mission Point, Bribie Island).	Module 3: Performance task Module 4: Investigation	Module 5: Exam Module 6: Project	Module 7: Project Module 8: Performance task Marine camp (3 days Mission Point, Bribie Island).

### COURSE REQUIREMENTS

Aquatic Practices provides opportunities for students to explore, experience and learn practical skills and knowledge valued in aquatic workplaces and other settings. The subject promotes an appreciation of the role coastal waters and inland waterways play in tourism, recreation, transport and food production, and of the legal and safety issues and codes of practice associated with waterways.

Through these learning experiences, students build their understanding of the conditions and expectations for work in aquatic settings and develop an understanding of career pathways, jobs and other opportunities available for participating in and contributing to aquatic and related fields and activities.

### CAREER PATHWAYS

A course of study in Aquatic Practices can establish a basis for further education and employment in the fields of recreation, tourism, fishing and aquaculture.

The subject also provides a basis for participating in and contributing to community associations, events and activities, such as yacht and sailing club races and competitions and boating shows.

### REAL PEOPLE TALKING ABOUT AQUATIC PRACTICES
