

DURATION OF SUBJECT	FULL YEAR
FINANCIAL COMMITMENT	REFER TO PROPOSED FEE SCHEDULE
COURSE REQUIREMENTS	
Students require an approved scientific calculator in this subject.	
COURSE CONTENT	
UNIT 1	ASSESSMENT
Measurement Students investigate how to apply area formulas to find area of regular shapes and volume in prisms. Students apply their learning to real world problems.	Exam
UNIT 2	ASSESSMENT
Geometry and Trigonometry Students explore how similarity of triangles can describe the relationship between triangles. Students investigate Pythagoras theorem and trigonometric rules to solve real world problems.	Exam
UNIT 3	ASSESSMENT
Algebra and Linear Functions Students explore linear functions and the relationship between the graph and equation. Students extend their index laws understanding to apply these in algebraic situations.	Exam
UNIT 4	ASSESSMENT
Data and Chance Students explore real life data activities to understand how the distribution of larger data sets informs analysis. Student explore the probability of multiple events occurring and compare this to real life occurrences.	Assignment & Exam
CAREER PATHWAYS	
<ul style="list-style-type: none"> • Mathematics helps us develop analytical and reasoning skills. • Reasoning is the ability to think logically about a situation. • Analytical and reasoning skills are valuable because they help us solve problems and look for solutions. • Many future careers will require sound mathematical, analytical and reasoning skills.
